

TIGER EC3500A

PORTABLE SINGLE PHASE GENERATOR

Tiger EC3500A Air Cooled, 4 Stroke is adopted advanced technology OHV to design the generator. It reduces the fuel consumption, enable the durability and forward the time of usage. The machine also adopt brush, AVR and carbon brush voltage adjustor device to enable the function. All the devices can help the generator enable the voltage more stable, forward the alternator more steady-going and reliable. DC output and double voltage output are also available. The machines are starting fast, running steadily and reliable, enough power, it with high quality can save your money and time to maintain or mending.

Max. Power (W) 2700

Rated Power (W) 2500

Voltage (V) 220

Frequency (HZ) 50

Rated Current (A) 11.4

Engine Model TE200

Max. Output (HP) 6.5

Noise Level (at 7m) 65dB

Displacement (cc) 196

Starting System Recoil

Ignition System Non-contact transistorized ignition (T.C.I)

Type Force air-cooled, 4 strokes, OHV

Fuel tank (L) 12

Oil Capacity 0.6

Dimension (L×W×H) mm 605×440×445

N.W (Kg) 47

20'FCL (pcs) 235
